

E-Rate Application Data

		Metropolit	tan Status	
	Urban	Suburban	Rural	Overall
Yes, applied	58.9%	32.4%	44.6%	41.3%
	(n=299)	(n=972)	(n=2,396)	(n=3,667)
Yes, another organization applied on the library's behalf	11.2%	22.8%	14.5%	17.1%
	(n=57)	(n=683)	(n=781)	(n=1,520)
No, did not apply	27.2%	40.6%	36.5%	37.4%
	(n=138)	(n=1,219)	(n=1,959)	(n=3,316)
Unsure	2.7%	4.2%	4.4%	4.2%
	(n=14)	(n=125)	(n=236)	(n=375)

Figure 50 shows that 58.4 percent of libraries report applying for an E-rate discount, whether directly (41.3 percent) or as part of another organization's application (17.1 percent), an increase from 2010-2011 (54.4 percent). As with last year, the highest percentage libraries applied that for E-rate discounts were in urban areas (70.1 percent), followed by rural (59.1 percent) and suburban (55.2 percent) libraries.

	Metropolitan Status				
Reasons	Urban	Suburban	Rural	Overall	
The E-rate application process is too	39.3%	32.9%	35.0%	34.5%	
complicated	(n=54)	(n=390)	(n=673)	(n=1,117)	
The library staff did not feel that the library	14.8%	16.6%	14.8%	15.5%	
would qualify	(n=20)	(n=197)	(n=284)	(n=501)	
Our total E-rate discount is fairly low and	37.7%	32.0%	31.9%	32.2%	
not worth the time needed to participate in	(n=52)	(n=379)	(n=613)	(n=1,044)	
the program	(11 02)	(11 070)	(11 010)	(11 1,044)	
The library receives E-rate discounts as	8.2%	10.6%	4.0%	6.6%	
part of a consortium, so therefore does not	(n=11)	(n=125)	(n=78)	(n=214)	
apply individually	()	(=0)	()	(=)	
The library was denied funding in the past	1.6%	2.1%	2.2%	2.1%	
and thus is discouraged from applying in	(n=2)	(n=25)	(n=42)	(n=69)	
subsequent years		(- /	, ,	(11)	
The library did not apply because of the	44.00/	00.00/	07.70/	00.40/	
need to comply with CIPA's (Children's	44.3%	29.6%	27.7%	29.1%	
Internet Protection Act) filtering	(n=61)	(n=350)	(n=532)	(n=944)	
requirements	0.00/	0.00/	0.00/	7.00/	
The library has applied for E-rate in the	8.2%	6.6%	8.6%	7.9%	
past, but no longer finds it necessary	(n=11)	(n=79)	(n=165)	(n=254)	
Other	18.0%	18.7%	27.4%	23.8%	
14000	(n=25)	(n=222)	(n=526)	(n=773)	
Will not total 100%, as respondents could sel	ect more than one	e option			

Figure 51 shows the reasons that 41.6 percent (Figure 50) of public library systems did not apply for E-rate discounts. The top three reasons reported were that the E-rate application process is too complicated (34.5 percent), the E-rate discount is low and not worth the time needed to participate (32.2 percent), and the library did not comply with CIPA filtering requirements (29.1 percent). In urban libraries the ranking is slightly differing, with CIPA compliance (44.3 percent) being reported above the complicated application process (39.3 percent) and the low discount amount (37.7 percent).

Figure 52: Public Library Systems Receiving an E-Rate Discount by Category						
		Metropolitan Status				
E-Rate Categories	Urban	Suburban	Rural	Overall		
Internet Connectivity	75.0%	57.9%	61.5%	61.3%

	(n=66)	(n=143)	(n=263)	(n=472)		
Will not total 100%, as respon	ndents could select mo	re than one option				

The percentage of public library systems receiving E-rate discounts by category are shown in Figure 52. The highest percentage of discounts were received in the telecommunications category, both overall (84.7 percent) and in urban (85.4 percent), suburban (82.2 percent), and rural (85.7 percent) libraries, which is consistent with the findings from 2010-2011. The biggest change was seen in discounts for Internet

connectivity in suburban libraries, which increased to 61.3 percent this year from 57.3 percent last year and 49.8 the year before.

Broadband Technology Opportunity Program (BTOP) and Broadband Initiatives Program (BIP)

Figure 53: Public Library Systems Applying for a National Telecommunications and Information Administration (NTIA) Broadband Technology Opportunity Program (BTOP) or a Department of Agriculture Broadband Initiatives Program (BIP) award(s) in either Wave I or Wave II, by Metropolitan Status

Metropolitan Status			
Urban	Suburban	Rural	Overall
46.6%	50.1%	44.5%	46.5%

25.1%	15.4%	19.2%	18.3%
(n=127)	(n=461)	(n=1,026)	(n=1,614)
21.1% (n=106)	22.1% (n=661)	21.3% (n=1,137)	21.6% (n=1,904)
7.1% (n=36)	12.4% (n=371)	15.0% (n=799)	13.7% (n=1,207)
	46.6% (n=236) 25.1% (n=127) 21.1% (n=106)	Urban Suburban 46.6% 50.1% (n=236) (n=1,498) 25.1% 15.4% (n=127) (n=461) 21.1% 22.1% (n=106) (n=661) 7.1% 12.4%	Urban Suburban Rural 46.6% 50.1% 44.5% (n=236) (n=1,498) (n=2,372) 25.1% 15.4% 19.2% (n=127) (n=461) (n=1,026) 21.1% 22.1% 21.3% (n=106) (n=661) (n=1,137) 7.1% 12.4% 15.0%

This was the second year that the survey asked libraries about application for BTOP and BIP programs (Figure 53), but with the addition of asking libraries about the successful receipt of BTOP and BIP grants. 38.9 percent of libraries reported applying this year (18.3 percent directly, 21.6 percent included in another entity's application), which is a decrease from 45 percent last year. Application was highest in urban libraries (46.2 percent), followed by rural (40.5 percent) and suburban (47.5 percent) libraries.

Will not total 100%, as respondents could se	lect more than one	option	•	

The types of BTOP and BIP applications submitted and received by public library systems are shown in Figure 54. The highest percentage of applications were submitted for public computer centers (39.7)

percent), which is a notable increase from 29.6 percent last year. This is followed by sustainable broadband (12.1 percent), Sustainable Broadband (12.1 percent), and middle mile (10.1 percent). Urban libraries reported the highest percentage of applications for public computer centers (68.4 percent) and middle mile (12.3 percent), while rural libraries reported the highest percentage of applications for sustainable broadband (13.1 percent) and suburban libraries reported the highest percentage of applications for SBDD (8.3 percent).

Local and county government funds represent the most common source of funding for public libraries in all geographic areas (94.2 percent), followed by donations and local fundraising (84.8 percent). Urban libraries receive funding from more varied sources than public libraries in other geographic areas. This is particularly noticeable in measures of federal funds, with 75.6 percent of urban libraries receiving such funding versus 53.4 percent of rural libraries and 46.8 percent of suburban libraries.

Figure 57 shows the changes to public library system's operating budgets in 2012. In the 2010-2011 survey, libraries anticipated that 35.1 percent of budgets would increase, 39.6 percent would stay the same and 20.1 percent would decrease in 2012. In fact, 43.2 percent of library system's 2012 operating budgets increased, 29.7 percent stayed the same and 27.0 percent decreased. Rural libraries saw the largest increase in their 2012 budgets (43.8 percent), while urban libraries saw the largest decrease (45.6 percent).

The anticipated changes to public library system's 2013 operating budgets are presented in Figure 58. Overall, 37.6 percent of libraries anticipate an increased budget in 2013, while 40.2 percent anticipate no change, and 22.1 percent anticipate decreases.

Figure 59 shows the changes to public library systems' current fiscal year budget, anticipated or already experienced. Fewer systems reported decreases this year (16.3 percent) than last year (20.9 percent), but the percentage reporting increases changed only slightly between this year (12.7 percent) and last year (11.3 percent). This year all types of libraries anticipated less decreases in funding, with 22.7 percent of urban libraries, 17.0 percent of suburban libraries, and 14.5 percent of rural libraries expecting funding cuts. This is compared to 27.5 percent of urban libraries, 23.2 percent of suburban libraries, and 19.0 percent of rural libraries expecting budget decreases last year.

Weighted missing values, n=667 **Key:** *: Insufficient data to report

The majority of public library budgets were stable in over the last three years, with 63.7 percent either staying the same or changing by no more than 4 percent (Figure 60). However, urban libraries faced the highest number of budget decreases, with 53.4 percent having budget reductions. By comparison, only 37.5 percent of suburban libraries and 26.2 percent of rural libraries faced budget cuts in the same fiscal year.

More than half (55.2 percent) of public libraries remained at the same level of staffing over the last three years as evidenced by Figure 61. However, this situation varied greatly by geographic region. 60.7 percent of urban libraries dealt with decreases in Full Time Equivalent staff, and 75.7 percent of these libraries reported staffing reductions due to permanent eliminations of these positions. By comparison, only 28.0 percent of suburban libraries and 16.2 percent of rural libraries faced FTE staff reductions.

Key: *: Insufficient data to report

While the majority of public libraries (59.4 percent) did not increase or decrease the number of hours they were open over the last three years, slightly more decreased their hours (21.5 percent) than increased (15.9 percent) as shown in Figure 62. Reductions in hours were most noticeable in urban libraries, with 40.5 percent decreasing their hours versus 26.2 percent of suburban and 17.2 percent of rural libraries reducing their operational hours. For all libraries, the majority of these reductions (78.5 percent) were due to budget cuts.

		Metropolit	an Status	
	Urban	Suburban	Rural	Overall
Three Years Ago	149.0	21.7	6.1	20.7
(mean)	(n=254)	(n=1,358)	(n=2,318)	(n=3,930)
Today	133.6	21.0	6.0	19.2
(mean)	(n=249)	(n=1,348)	(n=2,333)	(n=3,930)

Figure 63 shows the mean changes in Full Time Equivalents (FTEs) in libraries over the last three years. Libraries overall reported a slight decrease in FTEs, with an average of 20.7 three years ago as compared to an average of 19.2 today (reported as of November 2011). The largest reported decrease in FTEs over the three year period is in urban libraries, which reported an average of 149.0 FTEs three years ago as compared to an average of 133.6 as of November 2011. Rural and suburban libraries reported nearly the same average number of FTEs in November 2011 as compared to three years prior to that.

		Metropolit	an Status	
	Urban	Suburban	Rural	Overall
Three Years Ago	10,960.2	1,969.2	1,121.2	1,912.5
(mean)	(n=328)	(n=2,199)	(n=3,912)	(n=6,439)
Today	10,894.4	1,914.5	1,107.9	1,900.2
(mean)	(n=340)	(n=2,209)	(n=3,897)	(n=6,439)

As shown in Figure 64, the average number of hours open by libraries decreased slightly in the three years prior to November 2011. In November 2011, libraries reported an overall average number of hours open per year of 1,900.2, as compared to 1,912.5 three years ago. The largest drop in hours open occurred in Urban libraries with a reported average drop of 65.8 hours. This was followed by Suburban libraries with a reported average drop of 54.7 hours, Rural libraries with a reported average drop of 13.3 hours.

Figure 65: FY2012 Public Library Systems Average Total Operating Expenditures, by Type						
	N	Metropolitan Status				
Expense Category	Urban	Suburban	Rural	Overall		
Salaries (including benefits)	\$7,136,475.28	\$1,264,236.49	\$270,670.18	\$1,007,608.78		
	(n=408)	(n=2,460)	(n=4,247)	(n=7,115)		
Callastians	\$1,263,487.25	\$224,049.88	\$50,915.45	\$183,100.26		
Collections	(n=410)	(n=2,392)	(n=4,092)	(n=6,893)		
Other expenditures (including	\$2,571,809.27	\$405,092.65	\$104,602.77	\$354,462.38		
contractual services)	(n=396)	(n=2,317)	(n=3,987)	(n=6,700)		

Expenditures for libraries varied significantly by geographic classification, with the average urban library system spending more than twenty-five times as much in FY2011-FY2012 than its rural counterpart (see Figure 65). However, in all cases salaries and benefits accounted for most of these expenditures, with these costs being 65.1 percent for urban libraries, 66.7 percent for suburban libraries, and 63.5 percent for rural libraries.

Figure 66: FY2013 Public Library Systems Average Total Operating Expenditures, by Type					
	N	Metropolitan Status			
Expense Category	Urban	Suburban	Rural	Overall	
Salaries (including benefits)	\$7,198,951.34	\$1,230,278.13	\$250,763.86	\$943,396.91	
	(n=285)	(n=1,634)	(n=3,254)	(n=5,173)	
Collections	\$1,284,130.77	\$225,902.71	\$48,434.00	\$174,650.72	
	(n=283)	(n=1,605)	(n=3,141)	(n=5,029)	
Other expenditures (including contractual services)	\$2,634,389.06	\$427,041.73	\$98,757.61	\$345,900.31	
	(n=274)	(n=1,544)	(n=3,045)	(n=4,863)	

When compared to actual expenditures in FY2011-2012 (Figure 66), libraries in all three geographic classifications anticipated expenditure decreases for FY2012-2013. However, the highest of these anticipated decreases is 6.4 percent for urban libraries, followed by 4.6 percent for suburban libraries and 2.4 percent for rural libraries.

Information Technology Budget Sources and Expenditures

Figure 67: Public Library System Payment of Technology Expenditures, by Metropolitan Status				
	Metropolitan Status			
Financial Support	Urban	Suburban	Rural	Overall
The library pays directly for ALL of its	59.0%	54.5%	55.0%	55.1%
technology costs	(n=267)	(n=1,484)	(n=2,713)	(n=4,464)
The library pays directly for SOME of its	36.5%	35.9%	38.3%	37.4%
technology costs	(n=165)	(n=976)	(n=1,890)	(n=3,032)
The library does not pay directly for any	4.5%	9.6%	6.7%	7.5%
of its technology costs	(n=20)	(n=261)	(n=329)	(n=610)
Weighted missing values, n=923				

Figure 67 shows that the majority of public library systems (54.6 percent) pay for all of their own technology costs, which is consistent with last year's findings. 37.4 percent of libraries either receive some assistance paying their technology costs or have all of these expenditures paid by another government agency or outside entity (7.5 percent). The highest percentage of libraries paying for all of their own technology costs are in urban areas (59.0 percent).

The changes to public library systems' technology budgets for FY2012 are reported in Figure 68. 35.8 percent of libraries reported an increase in their technology budgets, including 5.8 percent reporting an increase of more than 10 percent. This represents virtually no change from 35.9 percent reporting an increase last year. Libraries reporting a decrease in technology budgets also declined from 14.2 percent for FY2011 to 11.8 percent in FY2012. The highest percentage of libraries reporting an increase were in suburban areas (38.1 percent), while the highest percentage reporting decreases were in urban areas (23.7 percent). Suburban libraries (6.6 percent) had the highest percentage of libraries reporting an increase of over 10 percent for their FY2012 technology budgets.

The majority of public library systems (51.7 percent) anticipate no change in their FY2013 technology budget (see Figure 69). Overall, 37.9 percent anticipate an increase and 10.4 percent anticipate decreases. 16.2 percent of libraries in urban areas and 14.0 percent of library in suburban areas anticipate decreases, followed by 8.0 percent in rural library systems.

Figure 70: FY2012 Public Library Systems Average Total Technology-Related Operating Expenditures, by Type						
		Metropolitan Status				
Expense Category	Urban	Suburban	Rural	Overall

	(n=88)	(n=250)	(n=691)	(n=1,030)		

While technology-based salaries were the highest technology cost for all libraries, this figure declined with the size of each population served (see Figure 70). Salaries were the most significant technology cost for rural (64.2 percent), suburban (57.8 percent), and urban (46.1 percent) libraries.
